CONTENTS OF VOLUME 147

NUMBER 1, 25 MARCH 1981

PFAHL, M., Characteristics of Tight Binding Repressors of the *lac* Operon . 1

GREENBLATT, J. and LI, J., The *nus*A Gene Protein of *Escherichia coli*. Its Identification and a Demonstration that it Interacts with the Gene *N* Transcription Anti-termination Protein of Bacteriophage Lambda . 11

KAUFMANN, G., Characterization of Initiator RNA from Replicating Simian Virus 40 DNA Synthesized in Isolated Nuclei 25

ROSA, M. D. and ANDREWS, N. C., Phage T3 DNA Contains an Exact Copy of the 23 base-pair Phage T7 RNA Polymerase Promoter Sequence . . 41

ROSA, M. D., Structure Analysis of Three T7 Late mRNA Ribosome Binding Sites 55

BLAKE, C. C. F., CASSELS, R., DOBSON, C. M., POULSEN, F. M., WILLIAMS, R. J. P. and WILSON, K. S., Structure and Binding Properties of Hen Lysozyme Modified at Tryptophan 62 73

DIJKSTRA, B. W., KALK, K. H., HOL, W. G. J. and DRENTH, J., Structure of Bovine Pancreatic Phospholipase A2 at 1·7 Å Resolution . . . 97

HITCHCOCK, S. E., ZIMMERMAN, C. J. and SMALLEY, C., Study of the Structure of Troponin-T by Measuring the Relative Reactivities of Lysines with Acetic Anhydride 125

HITCHCOCK, S. E., Study of the Structure of Troponin-C by Measuring the Relative Reactivities of Lysines with Acetic Anhydride . . . 153

LETTERS TO THE EDITOR

PFAHL, M., Mapping of *I* Gene Mutations which Lead to Repressors with Increased Affinity for *lac* Operator 175

STEVENS, F. J., WESTHOLM, F. A., PANAGIOTOPOULOS, N., SOLOMON, A. and SCHIFFER, M., Preliminary Crystallographic Data on the Human λIII Bence Jones Protein Dimer Cle 179

STEVENS, F. J., WESTHOLM, P. A., PANAGIOTOPOULOS, N., SCHIFFER, M., POPP, R. A. and SOLOMON, A., Characterization and Preliminary Crystallographic Data on the V_L-related Fragment of the Human κI Bence Jones Protein Wat 185

SMITH, T. F. and WATERMAN, M. S., Identification of Common Molecular Subsequences 195

ROSA, M. D., DNA Sequence for the T7 RNA Polymerase Promoter for T7 RNA Species II 199

Castellani, L. and O'Brien, E. J., Structure of Actin Paracrystals Induced by Nerve Growth Factor 205

Announcement 215

Number 2, 5 April 1981

Oka, A., Sugisaki, H. and Takanami, M., Nucleotide Sequence of the Kanamycin Resistance Transposon Tn*903* 217

Vardimon, L. and Doerfler, W., Patterns of Integration of Viral DNA in Adenovirus Type 2-transformed Hamster Cells 227

Wolgemuth, D. J. and Hsu, M.-T., Visualization of Nascent RNA Transcripts and Simultaneous Transcription and Replication in Viral Nucleoprotein Complexes from Adenovirus 2-infected HeLa Cells 247

Beyer, A. L., Bouton, A. H., Hodge, L. D. and Miller, O. L. Jr, Visualization of the Major Late R Strand Transcription Unit of Adenovirus Serotype 2 269

Taylor, K. A. and Amos, L. A., A New Model for the Geometry of the Binding of Myosin Crossbridges to Muscle Thin Filaments 297

Bell, J. A., Korszun, R. and Moffat, K., Structure of Imidazole Methemoglobin 325

Erickson, J. W., Bancroft, J. B. and Stillman, M. J., Circular Dichroism Studies of Papaya Mosaic Virus Coat Protein and Its Polymers . . 337

Letter to the Editor

Ambler, R. P., Meyer, T. E., Kamen, M. D., Schishmann, S. A. and Sawyer, L., A Reassessment of the Structure of *Paracoccus* Cytochrome *c*-550 351

Number 3, 15 April 1981

Strathern, J., Hicks, J. and Herskowitz, I., Control of Cell Type in Yeast by the Mating Type Locus. The α1–α2 Hypothesis 357

Ono, B.-I., Stewart, J. W. and Sherman, F., Serine Insertion Caused by the Ribosomal Suppressor *SUP46* in Yeast 373

Masurekar, M., Palmer, E., Ono, B.-I., Wilhelm, J. M. and Sherman, F., Misreading of the Ribosomal Suppressor *SUP46* Due to an Altered 40 S Subunit in Yeast 381

Ishiguro, J., Ono, B.-I., Masurekar, M., McLaughlin, C. S. and Sherman, F., Altered Ribosomal Protein S11 from the *SUP46* Suppressor of Yeast . 391

Clark-Walker, G. D., McArthur, C. R. and Sriprakash, K. S., Partial Duplication of the Large Ribosomal RNA Sequence in an Inverted Repeat in Circular Mitochondrial DNA from *Kloekera africana*. Implications for Mechanisms of the Petite Mutation 399

THOMPSON, J. F., WEGNEZ, M. R. and HEARST, J. E., Determination of the Secondary Structure of *Drosophila melanogaster* 5 S RNA by Hydroxymethyltrimethylpsoralen Crosslinking 417

MUNROE, S. H. and PEDERSON, T., Messenger RNA Sequences in Nuclear Ribonucleoprotein Particles are Complexed with Protein as Shown by Nuclease Protection 437

KOHNO, T. and GRAY, W. R., Chemical and Genetic Studies on L-Histidinol Dehydrogenase of *Salmonella typhimurium*. Isolation and Structure of the Tryptic Peptides 451

LETTERS TO THE EDITOR

THALLER, C., WEAVER, L. H., EICHELE, G., WILSON, E., KARLSSON, R. and JANSONIUS, J. N., Repeated Seeding Technique for Growing Large Single Crystals of Proteins 465

ALBER, T., FAHNSTOCK, M., MOWBRAY, S. and PETSKO, G. A., Preliminary X-ray Data for the Galactose Binding Protein from *Salmonella typhimurium* 471

NUMBER 4, 25 APRIL 1981

GERGEN, J. P., LOEWENBERG, J. Y. and WENSINK, P. C., $tRNA_2^{Lys}$ Gene Clusters in *Drosophila* 475

PARODI, S., CARLO, P., MARTELLI, A., TANINGHER, M., FINOLLO, R., PALA, M. and GIARETTI, W., A Circular Channel Crucible Oscillating Viscometer. Detection of DNA Damage Induced *in Vivo* by Exceedingly Small Doses of Dimethylnitrosamine 501

ANDERSON, W. F., GRÜTTER, M. G., REMINGTON, S. J., WEAVER, L. H. and MATTHEWS, B. W., Crystallographic Determination of the Mode of Binding of Oligosaccharides to T4 Bacteriophage Lysozyme: Implications for the Mechanism of Catalysis 523

MATTHEWS, B. W., REMINGTON, S. J., GRÜTTER, M. G. and ANDERSON, W. F., Relation Between Hen Egg White Lysozyme and Bacteriophage T4 Lysozyme: Evolutionary Implications 545

ACKERS, G. K. and JOHNSON, M. L., Linked Functions in Allosteric Proteins. Extension of the Concerted (MWC) Model for Ligand-linked Subunit Assembly and its Application to Human Hemoglobins 559

SANDERS, A. H., PURICH, D. L. and CANNELL, D. S., Oxygenation of Hemoglobin. Correspondence of Crystal and Solution Properties Using Diffusion Coefficient Measurements 583

LETTER TO THE EDITOR

FILLIPI, B., CHESSA, G. and BORIN, G., Semisynthetic Ribonucleases S′. The Role of Glutamine 11 597

Index to Volume 147

Acetic anhydride relative reactivities with lysines, a study of the structure of tropnonin-C, 153
— — — — — — — — — — — — — troponin-T, 125
Ackers, G. K. & Johnson, M. L., Linked functions in allosteric proteins. Extension of the concerted (MWC) model for ligand-linked subunit assembly and its application to human hemoglobins, 559
Actin paracrystals induced by nerve growth factor; structure, 205
Adenovirus 2-infected HeLa cells, visualization of nascent RNA transcripts and simultaneous transcription and replication in viral nucleoprotein complexes, 247
— serotype 2, visualization of the major late R strand transcription unit, 269
— type 2-transformed hamster cells, patterns of integration of viral DNA, 227
Alber, T., Fahnstock, M., Mowbray, S. & Petsko, G. A., Preliminary X-ray data for the galactose binding protein from *Salmonella typhimurium*, 471
Allosteric proteins, linked functions: extension of the concerted (MWC) model for ligand-linked subunit assembly and its application to human hemoglobins, 559
α1–α2 hypothesis. Control of cell type in yeast by the mating type locus, 357
Ambler, R. P., Meyer, T. E., Kamen, M. D., Schishmann, S. A. & Sawyer, L., A reassessment of the structure of *Paracoccus* cytochrome *c*-550, 351
Amos, L. A. (see also Taylor, K. A.), 297
Anderson, W. F., Grütter, M. G., Remington, S. J., Weaver, L. H. & Matthews, B. W., Crystallographic determination of the mode of binding of oligosaccharides to T4 bacteriophage lysozyme: implications for the mechanism of catalysis, 523
— — (see also Matthews, B. W.), 545
Andrews, N. C. (see also Rosa, M. D.), 41

Bacteriophage lambda gene *N* transcription anti-termination protein, a demonstration that it interacts with the *nus*A gene protein of *Escherichia coli*, 11
— T3 DNA contains an exact copy of the 23 base-pair phage T7 RNA polymerase promoter sequence, 41
— T4 lysozyme, crystallographic determination of the mode of binding of oligosaccharides; implications for the mechanism of catalysis, 523
— — — — relation to hen egg white lysozyme; evolutionary implications, 545
— T7, DNA sequence for the T7 RNA polymerase promoter for T7 RNA species II, 199
— — late mRNA ribosome binding sites, a structure analysis, 55
— — RNA polymerase promoter sequence of 23 base-pairs, an exact copy is contained in phage T3 DNA, 41
Bancroft, J. B. (see also Erickson, J. W.), 337
Bell, J. A., Korszun, R. & Moffat, K., Structure of imidazole methemoglobin, 325
Bence Jones human κI protein Wat, characterization and preliminary crystallographic data on the V_L-related fragment, 185
— — — λIII protein dimer Cle, preliminary crystallographic data, 179
Beyer, A. L., Bouton, A. H., Hodge, L. D. & Miller, O. L. Jr, Visualization of the major late R strand transcription unit of adenovirus serotype 2, 269
Binding of myosin crossbridges to muscle thin filaments, a new model for the geometry, 297
— — oligosaccharides to T4 bacteriophage lysozyme, crystallographic determination of the mode; implications for the mechanism of catalysis, 523
— properties and structure of hen lysozyme modified at tryptophan 62, 73
— repressors, tight, of the *lac* operon; characteristics, 1
— sites, ribosome, T7 late mRNA; a structure analysis, 55
Blake, C. C. F., Cassels, R., Dobson, C. M., Poulsen, F. M., Williams, R. J. P. & Wilson, K. S., Structure and binding properties of hen lysozyme modified at tryptophan 62, 73
Borin, G. (see also Fillipi, B.), 597
Bouton, A. H. (see also Beyer, A. L.), 269
Bovine pancreatic phospholipase A2, structure at 1·7 Å resolution, 97

Cannell, D. S. (see also Sanders, A. H.), 583
Carlo, P. (see also Parodi, S.), 501
Cassels, R. (see also Blake, C. C. F.), 73

Castellani, L. & O'Brien, E. J., Structure of actin paracrystals induced by nerve growth factor, 205
Catalysis mechanism, implications arising from a crystallographic determination of the mode of binding of oligosaccharides to T4 bacteriophage lysozyme, 523
Cell type control in yeast by the mating type locus. The α1–α2 hypothesis, 357
Chessa, G. (see also Fillipi, B.), 597
Circular dichroism studies of papaya mosaic virus coat protein and its polymers, 337
Clark-Walker, G. D., McArthur, C. R. & Sriprakash, K. S., Partial duplication of the large ribosomal RNA sequence in an inverted repeat in circular mitochondrial DNA from *Kloekera africana*. Implications for mechanisms of the petite mutation, 399
Cle, human λIII Bence Jones protein dimer, preliminary crystallographic data, 179
Crucible oscillating viscometer with circular channel. Detection of DNA damage induced *in vivo* by exceedingly small doses of dimethylnitrosamine, 501
Crystallographic data, preliminary, and characterization of the V_L-related fragment of the human κI Bence Jones protein Wat, 185
— — — on the human λIII Bence Jones protein dimer Cle, 179
— determination of the mode of binding of oligosaccharides to T4 bacteriophage lysozyme: implications for the mechanism of catalysis, 523
Crystals, single, large, of proteins, a repeated seeding technique for their growth, 465
Cytochrome *c*-550 from *Paracoccus*, a reassessment of the structure, 351

DNA damage induced *in vivo* by exceedingly small doses of dimethylnitrosamine, detection using a circular channel crucible oscillating viscometer, 501
— mitochondrial, circular, from *Kloeckera africana*, partial duplication of the large ribosomal RNA sequence in an inverted repeat; implications for mechanisms of the petite mutation, 399
— of phage T3 contains an exact copy of the 23 base-pair phage T7 RNA polymerase promoter sequence, 41
— sequence for the T7 RNA polymerase promoter for T7 RNA species II, 199
— SV40, replicating, characterization of initiator RNA synthesized in isolated nuclei, 25
— viral, patterns of integration in adenovirus type 2-transformed hamster cells, 227
Diffusion coefficient measurements for hemoglobin; correspondence of crystal and solution properties, 583
Dijkstra, B. W., Kalk, K. H., Hol, W. G. J. & Drenth, J., Structure of bovine pancreatic phospholipase A2 at 1·7 Å resolution, 97
Dimethylnitrosamine, DNA damage induced *in vivo* by exceedingly small doses; detection using a circular channel crucible oscillating viscometer, 501
Dobson, C. M. (see also Blake, C. C. F.), 73
Doerfler, W. (see also Vardimon, L.), 227
Drenth, J. (see also Dijkstra, B. W.), 97
Drosophila, $tRNA_2^{Lys}$ gene clusters, 475
— *melanogaster* 5 S RNA, determination of the secondary structure by hydroxymethyltrimethylpsoralen crosslinking, 417
Duplication, partial, of the large ribosomal RNA sequence in an inverted repeat in circular mitochrondrial DNA from *Kloeckera africana*. Implications for mechanisms of the petite mutation, 399

Egg white lysozyme, hen, relation to bacteriophage T4 lysozyme; evolutionary implications, 545
Eichele, G. (see also Thaller, C.), 465
Erickson, J. W., Bancroft, J. B. & Stillman, M. J., Circular dichroism studies of papaya mosaic virus coat protein and its polymers, 337
*Escherichia coli nus*A gene protein: its identification and a demonstration that it interacts with the *N* gene transcription anti-termination protein of bacteriophage lambda, 11
Evolutionary implications of the relation between hen egg white lysozyme and bacteriophage T4 lysozyme, 545

Fahnstock, M. (see also Alber, T.), 471
Filaments, thin, muscle, a new model for the geometry of the binding of myosin crossbridges, 297
Fillipi, B., Chessa, G. & Borin, G., Semisynthetic ribonuclease S′. The role of glutamine 11, 597
Finollo, R. (see also Parodi, S.), 501

Galactose binding protein from *Salmonella typhimurium*, preliminary X-ray data, 471
Gene clusters, $tRNA_2^{Lys}$, in *Drosophila*, 475

— *I* mutations which lead to repressors with increased affinity for *lac* operator; use of mapping, 175
— *N* transcription anti-termination protein of bacteriophage lambda, a demonstration that there is an interaction with the *nus*A gene protein of *Escherichia coli*, 11
— *nus*A protein of *Escherichia coli*; its identification and a demonstration that it interacts with the gene *N* transcription anti-termination protein of bacteriophage lambda, 11
Genetic and chemical studies on L-histidinol dehydrogenase of *Salmonella typhimurium*; isolation and structure of the tryptic peptides, 451
GERGEN, J. P., LOEWENBERG, J. Y. & WENSINK, P. C., $tRNA_2^{Lys}$ gene clusters in *Drosophila*, 475
